PERSONAL SUMMARY

As a Junior Web Developer, I thrive in front-end development and find excitement in exploring the world of back-end development.

After working in various customer service roles, I was seeking a change where I could utilize my existing skills and progress in a career with perfect blend of creativity, problem-solving, and continuous learning. It all started when I observed a friend working on a web development project, and I was immediately captivated by the field.

After going a self-taught route for a while, I enrolled in an intensive sixteen-week front end development bootcamp, where I had the opportunity to work on a variety of projects, both independently and collaboratively within a team. However, my learning journey does not end there. Each day, I strive to expand my skill set and deepen my understanding of various technologies by creating new projects.

WEB TECHNOLOGY AND SOFTWARE DEVELOPMENT SKILLS:

- HTML
- CSS
- Bootstrap
- JavaScript
- JQuery
- React
- Node.js
- Express.js
- MongoDB

PROJECTS

- **Personal Diary** is a secure and user-friendly web application. The app implements a robust login system to protect user data. This allows users to register and maintain a personal diary and notes online. With this app, users can privately document their thoughts, feelings, goals and stories. Users can easily edit, delete and find their diary entries, as well as take notes which enables them to maintain an up-to-date record of their personal journey. Technologies used: Node.js, Express.js, MongoDB, Mongoose, bcript, Nodemailer, EJS, moment.js, dotenv, HTML/CSS, JS.
  GitHub repository: https://github.com/1Eva1987/personal-diary
- **Roamer** The users can navigate to their desired destinations or explore the local area. It provides users with a map, accurate and up-to-date information on local weather, restaurants, buses and much more based on users' interests as well as the possibility to find the shortest route from one place to another. This app has a "Profile" page created using local storage. Once the user gets registered and logs in, he can save places and upload images. Technologies used: NodeJS, ReactJS, JavaScript, Bootstrap, React-router-dom, React-toastify, Emailjs, Moment, Axios and APIs.
  GitHub repository: https://github.com/1Eva1987/roamer

- **Workout Kitchen** . The user can search for recipes based on their preferred ingredients, as well as search for exercises based on their type and level of difficulty. The app includes the favorites page where the user

can save and delete chosen recipes and exercises. Technologies used: HTML, CSS, Bootstrap, jQuery, and APIs.
GitHub repository: https://github.com/1Eva1987/workout_kitchen

EDUCATION AND IT TRAININGS

- **Trilogy's Skills Bootcamp in Front-End Development**- edX Certificate of Completion - 2023
- **MRU University of Law**, Vilnius, Lithuania 2005 - 2010
